INJURED IN COLLISION.

Prof. R. H. Emberson and Family are Thrown from Buggy When Hit by an Automobile.

Prof. R. H. Emberson, a former instructor in the state Normal school, now connected with the University of Missouri at Columbia, was severely injured in a collision Sunday evening when an automobile hit the buggy in which he and his family were driving. Mrs. Emberson and her two babies were also injured.

Two cars driven by university students were racing on the same street. Mr. Emberson and family were driving. Both cars tried to pass the buggy first and the car driven by J. R. Derringer, of Albany, Mo., a freshman in the College of Agriculture, ran into the buggy tearing off the back wheels and throwing the occupants to the street. Mrs. Emberson held the baby boy as she was thrown from the buggy. It was thought the little boy was dead but quick medical attention survived him and he is getting along nicely.

Neither of the babies seem to be injured badly Monday. Both are slightly bruised. Mr. and Mrs. Emberson were badly bruised and scratched up. Mrs. Emberson's left knee cap is split and it was necessary for doctors to sew up a cut in her scalp on the right side of her head. Mr. Emberson's back and right shoulder were wrenched and strained. Both were confined to their home Monday.

Prof. Emberson is the head of the department of Rural Education at the University. He left Maryville in the spring of 1910 and was head of the History of Education department of the State Normal.

LECTURER NOLAN

TO APPEAR AT THE NODAWAY CHAUTAUQU IN AUGUST

HAS SERVED FIVE YEARS

In the Minnesota Legislature and is Noted as a Public Speaker—Believes in His Fellow Man.

W. L. Nolan who has been before the public for twenty years as an entertainer and lecturer, also as a student of public affairs, has been secured by the management of the 1914 assembly to deliver one of his popular lectures. He is widely known and most successful.

W. L. NOLAN

The newspapers have commented enthusiastically upon his work on the Lyceum platform and as a legislator.

Mr. Nolan has served five years as a member of the Minnesota state legislature and has taken an active part in many of the movements for civic reform. His chances of attaining to higher political honors in his own state are good and he may some day be heard from as a member of congress or governor.

Mr. Nolan is noted as a speaker along many lines and holds a unique position upon the lecture platform due to an original and refreshing fund of humor combined with a common sense and philosophical point of view. His lectures entertain and at the same time give his hearers something worth while.

Mr. Nolan is an optimist who believes in his fellowmen. He does not hesitate to criticize conditions that are unwholesome but with a spirit of optimism that believes in the ultimate good.

The humor of Mr. Nolan is kindly and always amusing, without any unnecessary ridiculing of those things that most people hold to be sacred and personal.

Mr. Nolan is called on widely for after-dinner speeches. In March, 1912, he was a speaker at the banquet of the Irish-American Sons of Erin in celebration of St. Patrick's day. It was the first banquet since the Irish-American Society and the American Sons of Erin united, making it an unusually important occasion. The St. Louis Globe-Democrat the next day said that M. Nolan proved witty, eloquent and versatile.

This is but one of scores of comments from well known newspapers:

Two New Houses to Be Built.

H. J. Becker has purchased a lot on Buchanan and Ninth streets and expects to begin at once the erection of a fine new home. Mr. Becker's brother-in-law, Lou A. Denny, has the adjoining lot and will also build a new \$2,000 residence this summer.

Miss Laurinda Craig of Boicow is visiting in Maryville, the guest of her cousin, Miss Laura Craig.

FISH FRY PICNIC

FOR THE COMMERCIAL CLUB MEMBERS NEXT TUESDAY

IS A REGULAR SESSION

Of the Club and Time Will be Spent Fishing and Having a Good Time—Plenty to Eat and Smoke.

The next regular meeting and banquet of the commercial club which is held the second Tuesday of each month will be held next Tuesday, June 9. A novelty is being planned for this meeting in the way of a fish fry and picnic "Down on the River," and the 102 river will probably be the scene of all the activities of the expedition.

All members of the club are invited. Committees will be appointed later to furnish transportation for those who have no conveyance in which to make the trip.

The officials state that there will be plenty to eat, and plenty to smoke, and to make sure that there will be plenty of fish for all at the fry there will probably be a committee appointed to do the fishing.

The members will leave for the river at 4 p. m., and everyone is expecting to have a big time.

FOR REPRESENTATIVE

Many Friends of George Robb Ellison Are Urging Him to Become A Candidate for that Office

George Robb Ellison is being urged by his many friends over the county to become a candidate for representative on the Democratic ticket but he has so far declined to run.

At the next session of the legislature the civil and criminal code is to be revised and not a better man could be chosen to help to revise the code than Mr. Ellison. He has been practicing law for many years and is regarded as one of the brightest attorneys in this part of the state.

Nodaway county would be ably represented in the legislature by Mr. Ellison on all matters and it is the wish of a large number of his friends not only in Maryville but in the county, that he will reconsider and become a candidate.

INTERVIEW C. F. BOOHER.

Tells St. Joseph News-Press Why He Voted for 20c a Mile Each way for Members.

Congressman Charles F. Booher, who voted for a continuation of the present payment of 20 cents a mile each way, gave the St. Joseph News-Press the following interview of his reasons for voting that way:

"I've stood for the payment of 20 cents a mile each way as compensation for travel of members of congress because I believe it was right that they should be paid on a flat mileage basis, and not be obliged to keep an account of their expenses," said Congressman Charles F. Booher Monday, explaining his vote on the mileage proposition. "I believe that members of congress should be at least on a par with officers of the army and navy, and marine corps on the question of mileage. These officers are paid 8 cents a mile and are not required to keep account of their expenditures. Neither should a congressman be compelled to keep an account of every item of expense. I am in favor of abolishing mileage entirely rather than to have this matter put on the basis of actual traveling expenses of members of the house and senate and those dependent upon them. In committee of the whole where there was no record vote I voted to reduce the mileage compensation to 5 cents a mile. That was defeated and I next voted to reduce it to 10 cents a mile. That was defeated.

On the basis of the payment of actual traveling expenses of congressmen and those dependent upon them the aggregate cost of the government will be greater than under the present practice of paying 20 cents a mile each way. Under the actual expense provision it will be possible for a member of congress to bring his household servants to Washington and take them back to his home at government expense.

"A question arose during the debate on the measure as to whether a member could draw expenses for her, if his wife was wealthy and therefore not dependent upon him. The chairman of the committee said that under such circumstances a member's wife would have to pay her own traveling expenses. On the whole the actual expense method of compensating members for travel to and from Washington is not a good one and I voted against it and in favor of the present system.

"The committee having the bill in charge has amended it by restoring the old mileage rate just as it was expected they would do. When it gets into conference I believe the matter will be adjusted on a flat mileage rate not greater than 10 cents per mile. So far as I am concerned the present mileage rate as compared with the proposed actual expense method of paying the traveling expenses of myself and family will not differ \$10. I am in favor of a flat rate, let it be what it may."

Anty Drudge—"Well, I wouldn't get too worried about it. He doesn't seem to be suffering. I'd give him another nickel and send him for a cake of Fels-Naptha Soap, and after this I'd order it by the box from my grocer, and that will save Johnny's insides from being nickel-plated."

FELS & CO., PHILADELPHIA

AGAINST ALLEGED HOG CHOLERA CURES.

Government Has Not Approved Any Treatment Except the Protective Serum.

Evidence of what appears to be a well organized campaign to delude farmers throughout the country into buying an alleged cure for hog cholera, under the impression that this has been investigated and approved by the United States government, has reached the Department of Agriculture. Articles praising this medicine, Benetol by name, are being sent out widespread to newspapers. These articles are so worded that it appears as if the Department of Agriculture had received reports from the State of Minnesota showing that the medicine had proved most beneficial. As a matter of fact the one report received by the Department was unofficial and unsolicited statement sent presumably from the promoters themselves. The Department attaches no importance whatsoever to this statement. It has no reason to believe in the efficiency of any proprietary cure for hog cholera and does not recommend any. Under certain conditions it urges farmers to protect their stock with anti-hog-cholera serum but that is all.

In connection with this attempt it may be said that the medicine, which is now put forward as good for hogs, was advertised some time ago as a means of killing tuberculosis, typhoid, and cancer germs according to an article published in the Journal of the American Medicine Association. At that time it was asserted that the army was interested in it. As a matter of fact the Army was no more interested then than the Department of Agriculture is now.

In view of the evidence that the attempt to create this false impression is persistent and widespread, all hog owners are warned to communicate with the United States authorities before accepting as true any statement that the Government recommends any treatment other than the serum already mentioned.

OF SPECIAL INTEREST TO ALL MOTHERS OF Bottle Babies

Upon the quality and purity of milk given to the little one largely depends its sturdiness, growth and health. Most of our patrons know that we have never hesitated to adopt every means which we believed would tend to better our product, so when we found upon investigation that the recently perfected De Laval Milk Clarifier would thoroughly cleanse milk of any objectionable matter which it might possibly contain, even after all our precautions, we immediately installed one of these machines in our plant and

all our milk is now clarified by the De Laval Centrifugal Process

By this process any objectionable matter which may have been in the milk previous to being drawn from the cow's udder or any subsequent contamination is eliminated, rendering a food for either infants or adults that is pure, clean and healthful.

The DeLaval Process of Milk Clarification does not involve the heating of milk, the use of chemicals or other outside agents. It is a scientific application of Centrifugal Force. Milk may be inspected, guaranteed or certified, but unless it is Centrifugally Clarified there can be no certainty that it is clean, pure, and healthful.

INJURED IN COLLISION.

Prof. R. H. Emberson and Family are Thrown from Buggy When Hit by an Automobile.

Prof. R. H. Emberson, a former instructor in the state Normal school, now connected with the University of Missouri at Columbia, was severely injured in a collision Sunday evening when an automobile hit the buggy in which he and his family were driving. Mrs. Emberson and her two babies were also injured.

Two cars driven by university students were racing on the same street. Mr. Emberson and family were driving. Both cars tried to pass the buggy first and the car driven by J. R. Derringer, of Albany, Mo., a freshman in the College of Agriculture, ran into the buggy tearing off the back wheels and throwing the occupants to the street. Mrs. Emberson held the baby boy as she was thrown from the buggy. It was thought the little boy was dead but quick medical attention survived him and he is getting along nicely.

Neither of the babies seem to be injured badly Monday. Both are slightly bruised. Mr. and Mrs. Emberson were badly bruised and scratched up. Mrs. Emberson's left knee cap is split and it was necessary for doctors to sew up a cut in her scalp on the right side of her head. Mr. Emberson's back and right shoulder were wrenched and strained. Both were confined to their home Monday.

Prof. Emberson is the head of the department of Rural Education at the University. He left Maryville in the spring of 1910 and was head of the History of Education department of the State Normal.

LECTURER NOLAN FISH FRY PICNIC

TO APPEAR AT THE NODAWAY CHAUTAUQUA IN AUGUST

HAS SERVED FIVE YEARS

In the Minnesota Legislature and is Noted as a Public Speaker—Believes in His Fellow Man.

W. I. Nolan who has been before the public for twenty years as an entertainer and lecturer, also as a student of public affairs, has been secured by the management of the 1914 assembly to deliver one of his popular lectures. He is widely known and most successful.

W. I. NOLAN

The newspapers have commented enthusiastically upon his work on the Lyceum platform and as a legislator.

Mr. Nolan has served five years as a member of the Minnesota state legislature and has taken an active part in many of the movements for civic reform. His chances of attaining to higher political honors in his own state are good and he may some day be heard from as a member of congress or governor.

Mr. Nolan is noted as a speaker along many lines and holds a unique position upon the lecture platform due to an original and refreshing fund of humor combined with a common sense and philosophical point of view. His lectures entertain and at the same time give his hearers something worth while.

Mr. Nolan is an optimist who believes in his fellowmen. He does not hesitate to criticize conditions that are unwholesome but with a spirit of optimism that believes in the ultimate good.

The humor of Mr. Nolan is kindly and always amusing, without any unnecessary ridiculing of those things that most people hold to be sacred and personal.

Mr. Nolan is called on widely for after-dinner speeches. In March, 1912, he was a speaker at the banquet of the Irish-American Sons of Erin in celebration of St. Patrick's day. It was the first banquet since the Irish-American Society and the American Sons of Erin united, making it an unusually important occasion. The St. Louis Globe-Democrat the next day said that M. Nolan proved witty, eloquent and versatile.

This is but one of scores of comments from well known newspapers:

Two New Houses to Be Built.

H. J. Becker has purchased a lot on Buchanan and Ninth streets and expects to begin at once the erection of a fine new home. Mr. Becker's brother-in-law, Lou A. Denny, has the adjoining lot and will also build a new \$2,000 residence this summer.

Mark R. Basford, of Waterloo, Iowa, has returned to his home after a week end visit with his mother, Mrs. Anna Basford, of this city. Mr. Basford is employed in the offices of the Great Western at Waterloo.

Prof. and Mrs. John Lesh left Monday for Harvard University where both will take a course of study. Prof. Lesh has been head of the history department of the Normal for the past three years.

Miss Laurinda Craig of Boicow is visiting in Maryville, the guest of her cousin, Miss Laura Craig.

Mr. and Mrs. Elmer McKee and John Lewis, of Ravenwood, were in Maryville Monday.

FOR THE COMMERCIAL CLUB MEMBERS NEXT TUESDAY

IS A REGULAR SESSION

Of the Club and Time Will Be Spent Fishing and Having a Good Time—Plenty to Eat and Smoke.

The next regular meeting and banquet of the commercial club which is held the second Tuesday of each month will be held next Tuesday, June 9. A novelty is being planned for this meeting in the way of a fish fry and picnic "Down on the River," and the 102 river will probably be the scene of all the activities of the expedition.

All members of the club are invited. Committees will be appointed later to furnish transportation for those who have no conveyance in which to make the trip.

The officials state that there will be plenty to eat, and plenty to smoke, and to make sure that there will be plenty of fish for all at the fry there will probably be a committee appointed to do the fishing.

The members will leave for the river at 4 p. m., and everyone is expecting to have a big time.

FOR REPRESENTATIVE

Many Friends of George Robb Ellison Are Urging Him to Become a Candidate for that Office

George Robb Ellison is being urged by his many friends over the county to become a candidate for representative on the Democratic ticket but he has so far declined to run.

At the next session of the legislature the civil and criminal code is to be revised and not a better man could be chosen to help to revise the code than Mr. Ellison. He has been practicing law for many years and is regarded as one of the brightest attorneys in this part of the state.

Nodaway county would be ably represented in the legislature by Mr. Ellison on all matters and it is the wish of a large number of his friends not only in Maryville but in the county, that he will reconsider and become a candidate.

INTERVIEW C. F. BOOHER.

Tells St. Joseph News-Press Why He Voted for 20c a Mile Each way for Members.

Congressman Charles F. Boohar, who voted for a continuation of the present payment of 20 cents a mile each way, gave the St. Joseph News-Press the following interview of his reasons for voting that way:

"I've stood for the payment of 20 cents a mile each way as compensation for travel of members of congress because I believe it was right that they should be paid on a flat mileage basis, and not be obliged to keep an account of their expenses," said Congressman Charles F. Boohar Monday, explaining his vote on the mileage proposition. "I believe that members of congress should be at least on a par with officers of the army and navy, and marine corps on the question of mileage. These officers are paid 8 cents a mile and are not required to keep account of their expenditures. Neither should a congressman be compelled to keep an account of every item of expense. I am in favor of abolishing mileage entirely rather than to have this matter put on the basis of actual traveling expenses of members of the house and senate and those dependent upon them. In committee of the whole where there was no record vote I voted to reduce the mileage compensation to 5 cents a mile. That was defeated and I next voted to reduce it to 10 cents a mile. That was defeated.

On the basis of the payment of actual traveling expenses of congressmen and those dependent upon them the aggregate cost of the government will be greater than under the present practice of paying 20 cents a mile each way. Under the actual expense provision it will be possible for a member of congress to bring his household servants to Washington and take them back to his home at government expense.

"A question arose during the debate on the measure as to whether a member could draw expenses for her, if his wife was wealthy and therefore not dependent upon him. The chairman of the committee said that under such circumstances a member's wife would have to pay her own traveling expenses. On the whole the actual expense method of compensating members for travel to and from Washington is not a good one and I voted against it and in favor of the present system.

"The committee having the bill in charge has amended it by restoring the old mileage rate just as it was expected they would do. When it gets into conference I believe the matter will be adjusted on a flat mileage rate not greater than 10 cents per mile. So far as I am concerned the present mileage rate as compared with the proposed actual expense method of paying the traveling expenses of myself and family will not differ \$10. I am in favor of a flat rate, let it be what it may."

ROY GUNN HEARING

CLAIM HE USED KNIFE

In Fight with Hiddle—Probably be Bound Over to Circuit Court—Crowd Here

Roy Gunn, who is charged with first degree murder for the killing of Leonard W. Hiddle, of Burlington Junction, had his hearing this afternoon before Justice W. L. Johnson and will probably be bound over to the September term of circuit court. The hearing was still in progress at press time.

Gunn was represented by Cook, Cummins & Dawson, while Prosecuting Attorney George Pat Wright was for the state. Gunn was very attentive and was a good listener to the testimony offered by the state.

The first witness called was Elmer Johnson, of Burlington Junction, who was in Trooper & Houston restaurant at that place at the time when the fight took place between Hiddle and Gunn, Hiddle receiving such injuries that he died on May 12, three days after the fight. Johnson told of the fight between Hiddle and Gunn and also of a knife being found on the floor after the trouble. It is claimed by the state that Gunn used a knife in the fight, stabbing Hiddle in the back.

At the hearing this afternoon, Mrs. L. W. Hiddle and her three young children, and also the parents of the deceased man, Mr. and Mrs. Noah Hiddle, of Shambaugh, Ia., were in attendance. There were a number of other relatives present.

The justice court room was well crowded with spectators, many of them being from Burlington Junction. The state had eleven witnesses to testify, while it is said that the defense will offer no testimony.

FELS & CO., PHILADELPHIA

AGAINST ALLEGED HOG CHOLERA CURES.

Government Has Not Approved Any Treatment Except the Protective Serum.

Evidence of what appears to be a well organized campaign to delude farmers throughout the country into buying an alleged cure for hog cholera, under the impression that this has been investigated and approved by the United States government, has reached the Department of Agriculture. Articles praising this medicine, Benetol by name, are being sent out widespread to newspapers. These articles are so worded that it appears as if the Department of Agriculture had received reports from the State of Minnesota showing that the medicine had proved most beneficial. As a matter of fact the one report received by the Department was unofficial and unsolicited statement sent presumably from the promoters themselves. The Department attaches no importance whatsoever to this statement. It has no reason to believe in the efficiency of any proprietary cure for hog cholera and does not recommend any. Under certain conditions it urges farmers to protect their stock with anti-hog-cholera serum but that is all.

In connection with this attempt it may be said that the medicine, which is now put forward as good for hogs, was advertised some time ago as a means of killing tuberculosis, typhoid, and cancer germs according to an article published in the Journal of the American Medicine Association. At that time it was asserted that the army was interested in it. As a matter of fact the Army was no more interested then than the Department of Agriculture is now.

In view of the evidence that the attempt to create this false impression is persistent and widespread, all hog owners are warned to communicate with the United States authorities before accepting as true any statement that the Government recommends any treatment other than the serum already mentioned.

OF SPECIAL INTEREST TO ALL MOTHERS OF

Bottle Babies

Upon the quality and purity of milk given to the little one largely depends its sturdiness, growth and health.

Most of our patrons know that we have never hesitated to adopt every means which we believed would tend to better our product, so when we found upon investigation that the recently perfected De Laval Milk Clarifier would thoroughly cleanse milk of any objectionable matter which it might possibly contain, even after all our precautions, we immediately installed one of these machines in our plant and

all our milk is now clarified by the
De Laval Centrifugal Process

By this process any objectionable matter which may have been in the milk previous to being drawn from the cow's udder or any subsequent contamination is eliminated, rendering a food for either infants or adults that is pure, clean and healthful.

The DeLaval Process of Milk Clarification does not involve the heating of milk, the use of chemicals or other outside agents. It is a scientific application of Centrifugal Force. Milk may be inspected, guaranteed or certified, but unless it is Centrifugally Clarified there can be no certainty that it is clean, pure, and healthful.
